Services & Repairs

Garage door repair can be a tricky and dangerous operation if you don't know what you are doing. There are extremely powerful springs that counter balance the weight of the garage door. The Garage Door springs are connected through a torsion bar to cables. If the cables become loose it can be very dangerous.

Garage Door Spring Repair

Never attempt garage door spring repair unless you are a good engineer. This is tricky, dangerous and requires special equipment. If you aren't convinced and want to do it yourself here is a link [Garage Door Spring Repair](#). A spring breaking is loud. If you hear a loud bang when opening or closing your garage door, its probably a broken spring. If the opener is straining to open the door, it may be a broken spring. If the door cocks to one side when you try to open it, it may be a broken spring. Even if your garage door opens don't use the garage door opener, as it may burn it out.

Garage Door Cable Repair

Don't do it yourself. This is dangerous and requires special equipment. The symptoms are similar to a broken spring without the loud bang.
